

I think that it would be fair to say that not more than 5 or 10 percent of the people in the United States would be aware of that; there's no reason they should be.

But when Congress decided to support medical education in this way, it served as a vital lifeline to keep our medical schools going and doing well and also meeting an important community need. And again, just to cut at this level in this way will really be a blow to the medical schools.

As you well know, we've tightened up on those payments in the last several years anyway. We've tried to practice certain economies. But to put what is clearly the world's finest system of medical education at risk I think would be a grave error. And that's another reason that I don't want to see cuts of this magnitude, because every, every American, even Americans who may never spend a dollar of the Government's money through the Medicare program and certainly may never be eligible for Medicaid, every American has a clear interest in having the best trained doctors in the world. And Medicare and Medicaid have contributed to that and need to be able to continue to contribute to that in an appropriate way. And I thank you.

Dr. Rabkin. Well, thank you, Mr. President.

The President. I thank all of you. I've enjoyed this conversation very much. I wish it had happened face to face. And I thank you for your concern and your interest. Just keep speaking up, keep going forward, and we'll keep working here to make sure that we do the right thing.

NOTE: The President spoke at 12:50 p.m. from the Oval Office at the White House to the conference at Lawrence Memorial Hospital of Medford, MA.

Statement on the Terrorist Attack in Riyadh, Saudi Arabia *November 13, 1995*

This morning's attack in Riyadh against an American facility is an outrage. Our condolences and prayers go out to the victims and their families. We appreciate the speed and professionalism with which Saudi authorities

have responded to this emergency and will work closely with them in identifying those responsible for this cowardly act and bringing them to justice.

Statement on Signing the Energy and Water Development Appropriations Act, 1996

November 13, 1995

Today I have signed into law H.R. 1905, the "Energy and Water Development Appropriations Act, 1996."

I urge the Congress to complete action on the remaining regular FY 1996 appropriations bills and to send them to me in an acceptable form. Last year, the Congress had sent—and I had signed—all 13 appropriations bills by September 30th. Regrettably, this is only the third bill that I have been able to sign for this fiscal year.

The Act provides \$19.3 billion in budgetary resources for programs of the Department of Energy, portions of the Departments of Interior and Defense, the Army Corps of Engineers, and several smaller agencies. While the bill does not fully fund my budget requests in a number of programs, the bill provides important funding for many major programs in these agencies.

The bill supports the Administration's proposal to reinvent the Department of Energy to improve the way it serves the American people. The bill provides \$6.1 billion for a critical environmental mission to continue working cooperatively with States and all other interested stakeholders to clean up the Department's former weapons production facilities. The bill also fully funds my request for the Department of Energy's Stockpile Stewardship and Management program, assuring the safety and reliability of the nuclear weapons stockpile without nuclear testing. In addition, the bill provides full funding for one of my key science initiatives to enhance the operation and availability of the Department of Energy's science facilities, giving more researchers access to these facilities to conduct more basic and applied research. This is a modest investment that will leverage a significant return from the scientific community.
